

Unlock smoother operations and governance by using IT-Conductor's ChAI™ for Automated SAP Transport Management.

## Why Choose IT-Conductor ChAI™?

### Reduced Operational Overhead

Automate routine SAP transport tasks and approvals, freeing up valuable SAP Basis resources for strategic initiatives.

- **Improve Transport Accuracy:**

Automate and monitor every step of your SAP transport lifecycle, drastically reducing manual errors and production issues.

- **Boost Basis Team Productivity:**

Free up SAP teams by automating routine transport tasks, so they can focus on strategic projects.

- **Strengthen Change Governance:**

Implement customizable workflows, approvals, and audit trails to meet compliance standards effortlessly.

## Delivering Value with ChAI™

### Built-In Governance & Compliance

Ensure every change follows a controlled, auditable process with ChAI's flexible approval workflows and complete transport traceability.

### End-to-End Change Lifecycle Automation

Manage the full transport lifecycle from request initiation to deployment and notification across SAP NetWeaver and SAP S/4HANA environments.

## Elevate Your Offering with IT-Conductor

Reduce manual work by:

**80%**

## Streamline SAP Change Management with ChAI™

IT-Conductor ChAI™ empowers organizations to automate SAP transport workflows, enhance control with integrated governance, and ensure faster, error-free deployments, boosting efficiency across SAP landscapes.
